days session on

Internet Governance for Persons with disabilities

The Path Finder solutions led by Dr. Shabbir Awan has conducted a wonderful training workshop for persons with disabilities in collaboration with world internet Society. This workshop has open us new windows in the field of internet governance. We became familiar with many emerging issues related to the field of internet governance.

Session conducted by Mr. Waqas Hasan regarding Fellowship and grants is a very Informative session in which we learn about the international fellow ship opportunities.

Other session conducted by deaf talk and Mr. Noorail Abbas regarding entrepreneurship is very encouraging for the participants especially for persons who wants to their own startups.

The we also become familiar about the internet governance system. The discussion regarding privacy issues in internet is highly appreciable.

Path finder solution has taken a wonderful step in which the persons with disabilities from all over Pakistan have get together In one venue which is a remarkable moment in my life and encouraging that this is lot of talent is present in this segment of the society which needs to be explored.

The concept of nothing about us without us should be promote all over the country to ensure the inclusion of PWDs in legislation about the community.

Thank you
